Pediatric Dentistry

Sabry Mansour, MD –
Urology

Tintin Manuela-Abad, MD –
Pediatrics

Ahmad Waseef, MD –
Nephrology

2012 Pinnacle Award Recipient Specialty Care Physician

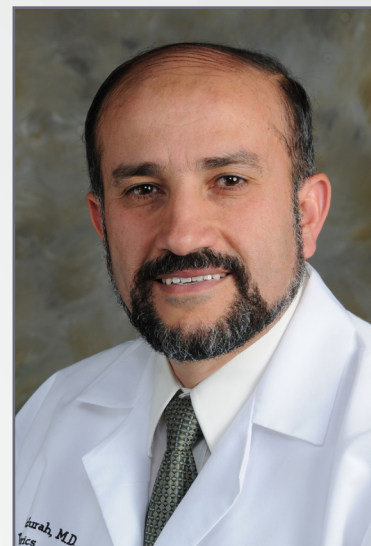

Ahmad K. Kaddurah, MD - Pediatric Neurology
Hurley Pediatric Specialists

"The best of people are those that bring most benefit to the rest of mankind"
- Prophet Muhammad

Dr. Kaddurah first heard about Hurley Medical Center through colleagues while working as a staff Pediatric Neurologist at Children's Hospital of Michigan, Detroit. Living in the City of Detroit, Dr. Kaddurah was initially reluctant to come to Hurley due to the commute, but took a chance and agreed to a two year trial period. It didn't take long and Dr. Kaddurah was hooked – the clinical expertise, friendly environment, staff and patients of Hurley Medical Center were the perfect match for him. "I felt like I belonged," said Dr. Kaddurah. He indicated that he is fortunate to be a member of the Hurley team and part of such a supportive community.

"I'm proud to be a part of the Hurley Children's Hospital and instrumental in the growth as we work to strengthen patient satisfaction and quality outcomes." Dr. Kaddurah says, "The patients here have a lot of concerns and issues. The time I spend with each patient is uncompromised, ensuring that no one feels rushed and everything is fully explained and understood. Patients may go elsewhere to seek a second opinion, but they almost always end up coming back."

Dr. Kaddurah's goal as a medical student was to become a pediatric neurologist. Growing up in a refugee camp in southern Lebanon, he recognized the shortage of pediatric specialists and made it his mission to do well in school and pursue his medical degree. "My parents taught the family early in life the value of hard work and a good education. After we were forced out of our home in Palestine, my parents sought refuge in Lebanon, to raise six children. Our humble family faced financial hardship together as a team, working three months each summer, earning money to support the family throughout the rest of the year," adds Dr. Kaddurah.

2012 Pinnacle Award Program

Friday -
September 20, 2103

Reception - 8:30 am

Ceremony -
9:00 am - 10:30 am

Merliss Brown Auditorium,
Hurley Medical Center

Pillows Donated for Breast Cancer Patients

Jamie Zuniga and her two daughters, Shelly and Melissa Beatty, helped sew 30 pillows for the breast navigation program. They wanted to help women in the community and make a positive difference. "Women love the pillows during their recovery from breast surgery. Hurley patients use these special pillows under the seatbelt to get home safely and also under their arm for healing," adds Marsha Schmit, BSN, CBCN, Hurley Breast Nurse Navigator. Thank you so much for your generous support!

Lapeer Students Donate to Hurley Breast Navigator Fund

Mr. Sweeney's 8th grade Service Learning class at Rolland-Warner Middle School recently organized a project to raise money and awareness for breast cancer. In late May, 8th graders raised money for the Hurley Breast Navigator Fund. With the help of M & B Graphics of Lake Orion, students designed and sold t-shirts and bracelets. Shirts were sold for \$10 and featured the breast cancer logo, while bracelets cost 50 cents each and were sold during lunch periods. A total of \$211.35 was raised and donated to Hurley's Breast Navigator Fund.

Employee/Physician Flu Vaccination Status Mandate

The Centers for Medicare and Medicaid Services (CMS) requires that EVERY employee, adult student, volunteer, licensed Independent Practitioner, and agency personnel who has worked in the medical center for one day between the October 1, 2013 through March 31, 2014 must declare their flu shot status (either received the flu shot or declined the flu shot).

Hurley Medical Center is proud to be partnered with Genesys and McLaren, to make your vaccination and documentation process easier. This partnership will allow the sharing of your vaccination information between all three medical centers to help everyone be in compliance.

All three hospitals will be offering free flu vaccines (contact the individual facilities for vaccine availability). Hurley Medical Center will be offering flu shots during our house-wide Blitz from September 24, 2013 through October 5, 2013. During this time, flu shots will be offered during all three shifts as well as during two consecutive weekends. Those who wish to decline the flu shot may also do so during the Blitz. Documentation of flu vaccines received in licensed independent practitioners' offices may be faxed to one of the three facilities, as CMS requires a copy of the actual vaccination form this year.

Thank you in advance for your help and participation. Additional information on the employee/physician flu vaccination program may be obtained by contacting Hurley's Employee Health Office at 810.262.9799.

Every Mother Knows

Hurley Children's Hospital is the region's (Genesee, Lapeer and Shiawassee counties) premier provider of comprehensive clinical services for mothers, babies, children and adolescents, providing outstanding care for expectant mothers and our youngest patients 24/7, including:

Break the Glass

As of July 23rd, attending physicians no longer have to Break the Glass to access charts.

Looking for a Facesheet?

For those who do not have the Patient Summary Activity tab to access reports, you can now access Facesheets from Chart Review.

1. Open the patient's chart and go to the Chart Review activity tab.
2. From the Encounter's tab, single click the Encounter you need to access. This action will display information in the bottom half of the workspace.
3. Scroll through the information on the bottom half of the workspace until you find the group labeled, "Link to Facesheet". Click the Facesheet hyperlink to view and print the Facesheet.

The screenshot shows the Epic Chart Review interface. On the left is a navigation pane with tabs: Patient Summary, Open Inquiry, Snapshot, Chart Review (highlighted), Flowsheets, Results Review, Synopsis, Medications, Immunizations, Letters, Order Entry, MAR, Patient Education, Doc Flowsheets, and Enter/Edit Results. The main area is titled 'Chart Review (Last refresh: 11:03:55 AM)' and includes filters, text search, and preview options. Below this is a table of encounters. A green box labeled '1.' points to the 'Open Inquiry' tab. Another green box labeled '2.' points to an 'Office Visit' encounter on 06/17/2013. A third green box labeled '3.' points to the 'Link to Facesheet' hyperlink in the bottom section of the workspace, which also shows a 'Link Test' for the same encounter.

Arthritis

2012 Pinnacle Award Recipient *Continued from page 1*

In the mid 70's, during the civil war, Dr. Kaddurah's family moved to Beirut, Lebanon. It was here that he chose one of the most prestigious medical schools in the Middle East for his higher education. Through the assistance of academic scholarships, Dr. Kaddurah graduated medical school in 1990 from American University of Beirut.

Following medical school, Dr. Kaddurah made the choice to move to the United States to further his education and pursue better economic opportunities. In 1995 he completed his pediatric residency at State University of New York, followed by his residency in child neurology at Wayne State University, Children's Hospital of Michigan. To help fulfill a requirement for U.S. citizenship, Dr. Kaddurah then worked as a pediatrician for three years in an underserved area in Watertown, New York. During this time, Dr. Kaddurah also completed his fellowship in neurophysiology and epilepsy at University of Michigan Medical School.

Prior to joining the medical staff at Hurley, Dr. Kaddurah worked on staff at Children's Hospital of Michigan, Detroit, as a pediatric neurologist and was in charge of EEG readings. It was here that Dr. Kaddurah met Dr. Michael Nigro, Chief of Neurology, whom he credits for being his mentor and an integral part of his success. This year marks Dr. Kaddurah's ten year anniversary with Hurley Medical Center. Dr. Kaddurah is Board Certified in Psychiatry and Neurology/Child Neurology, as well as Sleep Medicine. He currently treats child neurology and sleep medicine patients at the Hurley Pediatric Specialists Clinic and Hurley Pediatric Neurology Clinic.

Dr. Kaddurah served for four years as Co-Chair and now serves as Chair of the Hurley Annual Pediatric Update Program. He is Director, Pediatric Neurology and EEG Laboratory at Hurley Medical Center.

In a teaching capacity, Dr. Kaddurah currently serves as Associate Professor, Department of Pediatrics and Human Development, Michigan State University. Dr. Kaddurah plays a very active role in the Hurley Graduate Medical Education Program and takes pride in educating the resident physicians through their rotations here.

Dr. Kaddurah and wife, Rama, currently reside in Grand Blanc and enjoy playing an active role in the local Muslim Community. They are the proud parents of four children. Eldest son, Omar, is a well-known athlete locally, who won two state titles in running. Omar is currently studying pre-med and psychology at the University of Michigan. Son, Hisham, is also following in his father and brothers' footsteps by pursuing a pre-med degree at University of Michigan. Daughter, Sena, is ten years old and daughter, Yara, is four.

Beyond his devotion to practicing medicine and caring for his patients, Dr. Kaddurah also enjoys time with his family, jogging, swimming, tennis and reading. Soccer had been his passion, but due to injuries, he is no longer able to play. Dr. Kaddurah has family that reside all over the world, offering many areas for him to travel. He enjoys regular visits back to Lebanon to visit with his mother, as his father passed last year. He also has a sister in Sweden, a sister in Jordan and a brother in California.

The value of hard work instilled by his parents as a child, still resonates strongly with him today, keeping him busy on nights and weekends reading tests results, reviewing EEG's and working on research projects that may minimize exposure and improve outcomes for his patients. Dr. Kaddurah takes pride in the importance of his reputation amongst his colleagues, peers and patients for the quality of care and compassion he consistently delivers.
